

## MGE-5065SC

### HYBRID-READY MARINE TRANSMISSION

Twin Disc has taken its field-proven marine transmissions and created the MGE Series of gearboxes. This design provides power from the motor immediately in both clockwise and counter-clockwise directions. All units are equipped with a bi-directional oil pump to provide lubrication no matter the direction of shaft rotation, making these units a perfect fit for serial hybrid and diesel-electric applications or any application requiring a direct power response with a ratio reduction.

### FEATURES & BENEFITS

- Vertical offset, lightweight aluminum alloy housing
- Bi-directional lubrication pump
- Simplified design without a clutch
- Same installation envelope as standard marine transmission
- Same ratios as MGX-5065SC
- Metric design (except for some power transmitting and plumbing components)
