Global Customer Service & Support

WE PUT HORSEPOWER TO WORK®

Twin Disc History

Since 1918, Twin Disc has been developing, engineering, manufacturing and distributing power transmission and propulsion products to make things work — and work better. Farm tractors, road pavers, cranes, mining trucks, oil rigs, logging equipment, firefighting and rescue vehicles, pleasure boats, fishing and work boats, pumps, turbines — you name it. Where there's a heavy-duty vehicle, machine or marine craft that requires converting horsepower to propulsion or productivity, Twin Disc has a way to do it. So, in a very real sense, Twin Disc has helped put the world to work, for nearly a century.

Today, Twin Disc has built a worldwide reputation on our ability to engineer, build and service power transmission and propulsion systems for a vast array of applications. With our unique engineering skills and manufacturing expertise, we deliver systems that offer incomparable effectiveness and efficiency under the most grueling conditions.

Service Training

Training curriculum provided by the Twin Disc Global Customer Support Program is developed utilizing the latest information and is built upon decades of expertise. Group training in a classroom setting as well as hands-on training with electrical, mechanical and spin test stands provide the most in-depth training for all of our global technicians.

Customer Support

The Twin Disc Global Customer Support Program is committed to providing world-class support in the most efficient and consistent manner for all of our customers. Our regional sales offices and vast distribution network support Twin Disc products in service all over the world. With a corporate presence in every major market region, and our extensive and growing worldwide network of more than 250 distributor sales and service locations in 83 countries, you can rest assured you're never far from Twin Disc support.

Our program offers a wide range of services from the sales process through commissioning and eventually, upgrade. Twin Disc experts are always available, wherever you are, to help you obtain the best possible return on your investment in our products.

Genuine Parts

Twin Disc parts have been continually proven to provide the most reliable operation over an extended service life. Our parts are designed specifically for Twin Disc products and we ensure the proper materials and processes are used during the manufacturing process. All Twin Disc parts have been tested for superior performance within all product lines and provide the highest performance and dependability, reducing long-term operating costs throughout the life of your component.
