

MORBARK 6600 WOOD HOG HORIZONTAL GRINDER

LAND PRODUCTS

The Twin Disc HP1200 PTO keeps Morbark Wood Hog hungry for work.

Twin Disc Product:	HP1200 hydraulically actuated and self-adjusting wet clutch
Maximum Power Rating:	1243 hp (927 kW) at 1800 rpm
Pump Tower Capacity:	Two towers with two pump pads each
	400 hp maximum capacity per tower
	550 hp maximum capacity for both towers
Features:	Suitable for in-line and side-load applications
	Advanced control system for smooth engagement
	Remote actuation via J1939 or switch input
	High side load capability

Twin Disc HP1200 keeps Morbark Wood Hog hungry for work. Even the heaviest industrial applications get a boost from Twin Disc products.

Situation

Jason Wilcox, heavy equipment operator for Nebraska-based Hughes Mulch Product, should know. He spends his days running a Morbark 6600 Wood Hog, a monster of a machine.

The 6600 Wood Hog is a beast — a powerful, aggressive grinder that can quickly turn fallen trees, yard waste, and debris into mulch. With up to 1,200 HP available, it can process even the largest materials.

The model that Wilcox prefers to run uses a Twin Disc HP1200 wet clutch to handle all the power. “This is the smoothest clutch I have ever run in my life,” he said. “I’m not even kidding. We have four Wood Hogs, and I wish they all had this clutch to be honest. It handles all the horsepower. We’ve put 2,564 hours on it. It takes it in stride and does not skip a beat.”

With the extreme weather that the Great Plains and Midwest have been experiencing, Wilcox has kept busy clearing out storm damage. The HP1200 has held up no matter the job.

“(In 2017), we had tornadoes come through our area,” he said. “We were in the middle of Springfield, Nebraska, with that grinder, grinding away with it, and it whipped the work. I can shred 60-foot-tall trees with the Morbark, and it doesn’t miss a thing.”

“With this clutch, it’s been one less thing to worry about. Twin Disc is a very, very great company to work with. Those guys are awesome.”

Results

The HP1200 keeps the Wood Hog working under even the most challenging circumstances, Wilcox said. “I was on a 7-acre clearing job, and, unfortunately, I had to run a lot of dirt and foreign material through it. It helps this clutch is able to withstand the stress of operating the Morbark under those conditions.”

The clutch requires minimal maintenance. “In our industry, it seems like you’re always working on something,” Wilcox said. “With this clutch, it’s been one less thing to worry about. Twin Disc is a very, very great company to work with. Those guys are awesome.”
